Sustainability Statement

Founded over 43 years ago, Reading Plastic & Metal Advanced Machining has become a prominent pillar in the local community. The company has distinguished itself from others through an exceptional quality management system and supply chain, that works to exceed customer expectations while reducing the environmental impact, and maintaining superior quality standards.

Reading Plastic & Metal Advanced Machining is an ISO9001:2015 certified machine shop. Our quality management system ensures compliance to statutory and regulatory requirements, understanding and meeting the needs of various involved parties, and maintaining a successfully operating environment that can, not only effectively support the production of conformity products, but that also aligns with the company's environmental initiatives.

In addition, Reading Plastic & Metal Advanced Machining is committed to exceeding strict regulatory requirements related to organizational health and safety. The company upholds, with the highest regard, the safety and well-being of all employees, in a constructive environment that promotes personal and professional development.

We strive to exceed our customers' expectations, while maintaining compliance with all necessary requirements, implement and evaluate the effectiveness of our environmental initiatives, and promote a workplace that fosters the growth of each individual employee.

Michael W. Hafer
ISO9001:2015 Representative/Component Processing Manager
